

Meet the white keys

One small part of the piano: C4 to C5.

Middle C

Look for the groups

C is the white key just before a group of two black keys.

D sits between those two black keys.

F is the white key just before a group of three black keys.

Say the names, then find them

Move from left to right: C, D, E, F, G, A, B, C. The letters repeat; the octave number changes at the next C.

Middle C is labeled C4 in this pack. Octave numbers are not finger numbers. This is a reference diagram, not a full-size sticker template.

Cover the reference page while you try.

Circle the white key just before the group of three black keys.

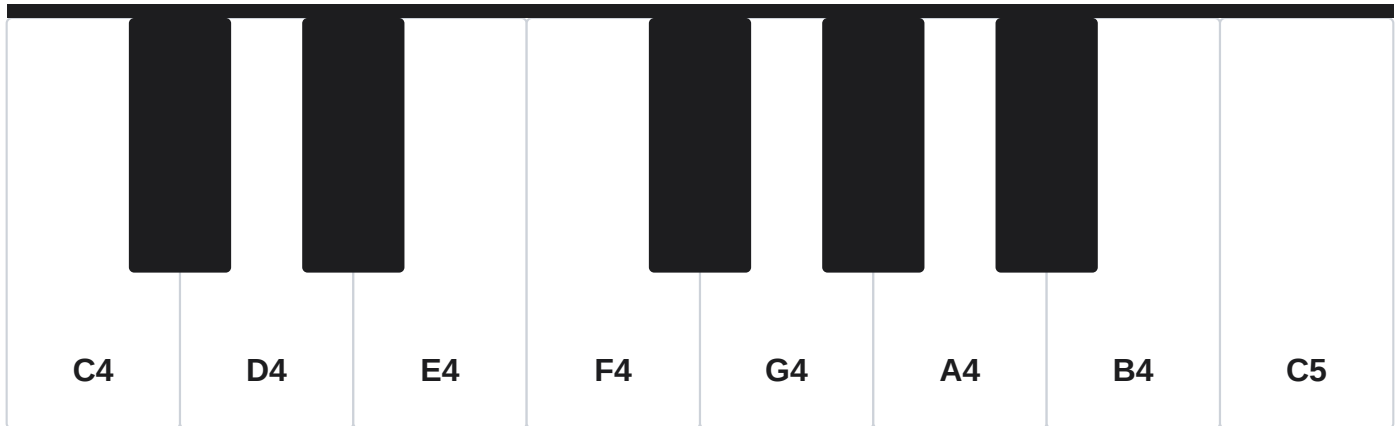

Put a dot on the higher C.

Point to the white key between the group of two black keys.

Use page 3 to check your answers. You can return to the reference page at any time.

Check the names together

White keys, from left to right.

C4 · D4 · E4 · F4 · G4 · A4 · B4 · C5

Circle: F4. Dot: C5. Between the pair: D4.

Use the pack in a lesson

Begin with the labeled page. Ask the learner to notice the two- and three-black-key groups. Move to the worksheet, then use this page to check the answers. Revisit a small part rather than treating the page as a speed test.

Try it on screen

Open the resource page and choose the matching online practice. It uses this same white-key range. The exercise checks note recognition, not piano technique.
