

Meet the white keys

One small part of the piano: C4 to C5.

Look for the groups

C is the white key just before a group of two black keys.

D sits between those two black keys.

F is the white key just before a group of three black keys.

Say the names, then find them

Move from left to right: C, D, E, F, G, A, B, C. The letters repeat; the octave number changes at the next C.

Middle C is labeled C4 in this pack. Octave numbers are not finger numbers. This is a reference diagram, not a full-size sticker template.

Your turn: name the keys

Use the same C4–C5 range. Cover the reference page while you try.

Write the letter name on each white key. Add octave numbers when you are ready.

Look again

Circle the white key just before the group of three black keys.

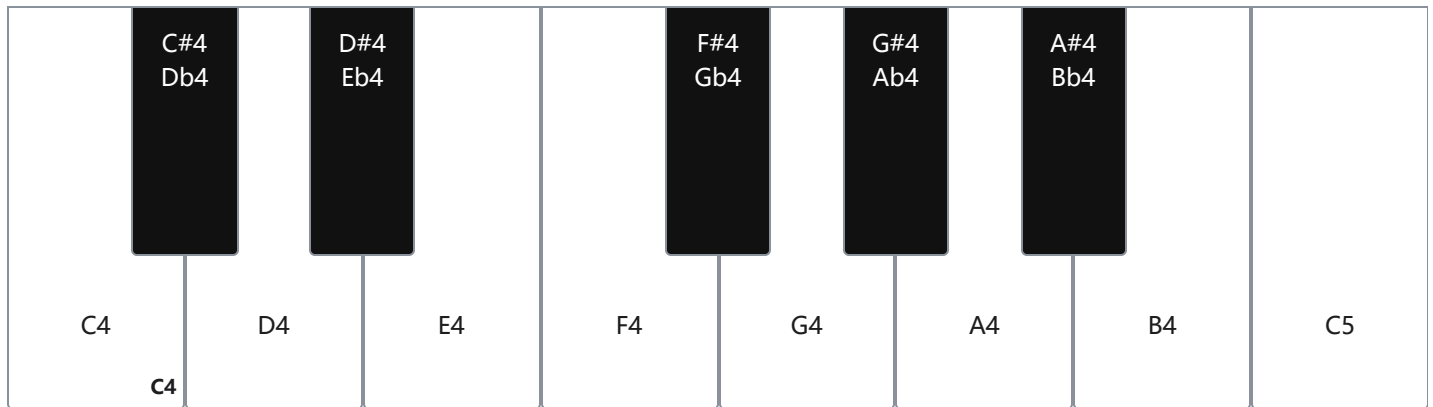

Put a dot on the higher C.

Point to the white key between the group of two black keys.

Use page 3 to check your answers. You can return to the reference page at any time.

Check the names together

White keys, from left to right.

C4 • D4 • E4 • F4 • G4 • A4 • B4 • C5

Circle: F4. Dot: C5. Between the pair: D4.

Use the pack in a lesson

Begin with the labeled page. Ask the learner to notice the two- and three-black-key groups. Move to the worksheet, then use this page to check and discuss the answers. Repeat a small part rather than treating the page as a speed test.

Try it on screen

Open the resource page and choose "Try the matching online practice." It uses this same white-key range. The exercise checks note recognition, not piano technique.
