

Piano chord practice starter

Three bounded tasks: identify formula tones, compare inversions and connect two named voicings. Answers are separated below.

1. Build C major

Select the pitch classes C, E and G. Octave doublings do not change the answer.

2. Read an inversion

C4 - E4 - G4 changes to E4 - G4 - C5. Name the lowest note and the position.

3. Connect two chords

Play C4 - E4 - G4, then C4 - E4 - A4. Circle the common tones and name the moving tone.

Answers

1. C, E and G.
2. E is lowest; this is first inversion, written C/E.
3. C and E are common tones; G moves to A. The second voicing is Am/C.
